

Basic Information Security Policy

At OZ Inc., our primary goal is to earn the satisfaction of all people involved, starting with our customers, in relation to:

- Planning, design production, system development, video production, research services, consulting, and operations utilizing digital platforms and technologies such as web and mobile.
- Planning, design production, research services, consulting, and operations related to print media.

We aim to be a company that is trusted and provides peace of mind.

Guidelines for Action

1. To ensure the confidentiality, integrity, and availability of information assets, we implement appropriate organizational and technical measures and respond to evolving information technologies and emerging threats.
2. We conduct information security training for all employees and thoroughly communicate this policy, striving to raise and maintain awareness.
3. We establish objectives related to the management system and information security, review them regularly, and continuously improve and maintain them.
